OpManager-A useful tool for IT Operations

Reviewer Function: IT    Company Size: 50M - 250M USD    Industry: Services (non-Government) Industry

My experience so far with OpManager has been positive. It has really helped with having a real time notification of issues with our network infrastructure. This is especially useful with a network of over 20 firewalls, having a tool like OpManager certainly helps knowing when critical incidents happen on the devices especially up/down critical incidents.

Good monitoring system, flexible and effective

Reviewer Function: IT    Company Size: <50M USD    Industry: Healthcare and Biotech Industry

After a few months of use, my experience with OpManager is truly positive. We use it to monitor various types of servers and network devices, a handful of probes deployed and a Central console to group alerts and display dashboards to support team. I like the flexibility of the product, especially the possibility to create custom monitors to monitor exactly what you want as closely as possible. Configuration between Central ...

**Excellent Tool to Monitor the Infrastructure**

Reviewer Function: IT Security and Risk Management    Company Size: 500M - 1B USD    Industry: Finance (non-banking) Industry

OpManager is an excellent solution to monitor all the network devices in my organization which helps me to take precautionary steps with its reports. The experience is good that we can store auto backup and monitor the interfaces. Also it provides us the complete visibility of network with quick support. It is very easy to deploy and implement, and the information it provides us is very useful.

**Seamless Infrastructure Monitoring with OpManager!**

Reviewer Function: IT    Company Size: 1B - 3B USD    Industry: IT Services Industry

OpManager has been a one-stop solution for monitoring all our devices in our organization. The reports generated are well designed to proactively mitigate any sort of security threat by taking preventive measures. The support team is very responsive and quick in solving our queries. It's worth considering this product as our ROI from this is more than 150%

ManageEngine is great for any management scenario you throw at it!

Reviewer Function: IT    Company Size: 500M - 1B USD    Industry: Banking Industry

OpManager has been a critical component of our monitoring systems for many, many years now. Ease of setup and use are key factors we continually turn to ManageEngine for solutions. We also use Patch Manager Plus, ADAudit and EventLog Analyzer to monitor our systems completely.
